FORGING FUTURES 2018

Greensborough College is excited to announce the commencement of its **Forging Futures Program** in Term 2.

The program aims to connect and captivate Grade 5 and 6 students with Greensborough College's range of innovative programs and amazing facilities. Forging Futures will create a culture of possibility, opportunity and achievement, providing students with the opportunity to enrich and exhibit their knowledge in a number of areas.

It is also a fantastic way to help students build their confidence in preparation for the transition from Primary to Secondary school.

PROGRAM DATES AND TIMES FOR 2018

Week 1	17th May	4:30pm - 6:00pm
Week 2	24th May	4:30pm - 6:00pm
Week 3	31st May	4:30pm - 6:00pm
Week 4	7th June	4:30pm - 6:00pm

THE PROGRAMS BEING OFFERED IN TERM 2, 2018 ARE:

KEY LEARNING AREA WORKSHOP		COST
Visual Arts	Art Taster	\$35.00
Media	Lights, Camera, ACTION!	\$35.00
Digital Technologies	Game Makers	\$35.00
Science	Laboratory Fun	\$35.00
Home Economics	Get Cooking	\$35.00
Humanities	Ancient Cities	\$35.00

Students will be presented with a 'Certificate of Participation' at the conclusion of the program.

Please note that workshop participation numbers are capped and we do expect classes to fill very quickly. Therefore, it is essential that you return the registration form and payment to us by Monday 8th May to avoid any disappointment.

You may choose to post, email, fax or deliver by hand your registration details form to the College Office. Please do not hesitate to contact Greensborough College on 9433 2666 if you have any questions.

VISUAL ARTS : ART TASTER

Do you see yourself as the next Monet, Picasso or Van Gogh? Then this series of Art workshops is for you! Come along to 4 sessions of fun where you will get to look at different areas of art and create a variety of artworks using different methods. Students will learn how to printmake, scratchboard, paint, draw, photograph and other interesting methods of art. Come along and learn to be an artist at Greensborough College!

MEDIA STUDIES : LIGHTS, CAMERA, ACTION!

Do you want to be the next Steven Spielberg or Tim Burton? We all know their films but what actually goes on behind the scenes? Over the duration of four action packed sessions you will learn all there is to know about the filmmaking production process. You will walk away from these sessions with your own completed film and be one step closer to sitting in that director's chair! As John Milius once said, "Everyone is a filmmaker" so why not start your career today!?

DIGITAL TECHNOLOGIES : GAME MAKERS

Would you like to learn how to make your own computer game? As Game Makers you will venture into the world of game design and create your own game that you can share with others and play for years to come. No previous coding experience needed! In this program we will delve into the coding behind games and see what really makes a game get a high score.

SCIENCE : LABORATORY FUN

Put on your white lab coat, take out the test tubes, switch on the microscope and light the Bunsen Burner – it's time to start experimenting! Have you ever wondered how a scientist extracts DNA from a banana? How to grow your own bacteria? Maybe you'd like to take a closer look at some interesting creatures and microorganisms under a microscope? Discover the awesome world of biology with a range of fascinating hands-on experiments.

HOME ECONOMICS : GET COOKING

Are you hungry when you get home and find that there is never anything delicious to eat? Do you wish you could cook like the celebrity chefs on TV? Get Cooking -Food and Technology is an excellent opportunity for you to gain confidence and skills to cook some easy, but delicious foods and start your cooking journey. Each week you will have fun being involved in preparing, cooking, eating and sharing what you have made. The recipes will be simple enough for you to make again at home and the program is lots of fun!

HUMANITIES : ANCIENT CITIES

Come and explore ancient cities and how they developed. During the sessions we will investigate how cities developed through hands on activities such as model making, photography, ICT, mapping and archeological digs. Come and explore how life as we know it began!
